

**Standard requirements for the quality of agricultural commodities:**

**Traded agricultural commodities – our buying up:**

- **Milling wheat "B",**
  - Standard requirements for the quality:
    - minimum: N-substances 12%, sedimentation index (Green) 25, Decline No. 220, hectolitre weight 76 kg/hl
    - maximum: humidity 14.5%, additives and impurities 2%
  
- **Milling wheat "A"**
  - Standard requirements for the quality:
    - minimum: N-substances 13%, sedimentation index (Green) 45, Decline No. 250, hectolitre weight 78 kg/hl
    - maximum: humidity 14.5%, additives and impurities 2%
  
- **Milling wheat "E"**
  - Standard requirements for the quality:
    - minimum: N-substances 14.5%, sedimentation index (Green) 55, Decline No. 280, hectolitre weight 78 kg/hl
    - maximum: humidity 14.5%, additives and impurities 2%
  
- **Malting barley**
  - Standard requirements for the quality:
    - must not be a mixture of cultivars
    - minimum: germination 95%, grain rate above the sieve: 2.5 mm 90%
    - maximum: humidity 14.5%, N-substances 11.5%, additives, impurities 2%
  
- **Feed corn**
  - Standard requirements for the quality:
    - more specifications – will be given on request
    - Must not be genetically modified
  
- **Feed wheat**
  - Standard requirements for the quality:
    - bulk density minimally 72/73 kg/hl, additives, impurities maximum 2%, humidity maximum 15%,
  
- **Feed barley**
  - Standard requirements for the quality:
    - bulk density minimally 62/63 kg/hl, additives, impurities maximum 2%, humidity maximum 15%,

- **Feed rye**
  - Standard requirements for the quality:
    - bulk density minimally 68 kg/hl, additives, impurities maximum 2%, humidity maximum 15%, maximally 0.1% of ergot
  
- **Feed oat**
  - Standard requirements for the quality:
    - bulk density minimally 54 kg/hl, additives, impurities maximum 2%, humidity maximum 15%,
  
- **Wheat bran**
  - Standard requirements for the quality:
    - According to standard conventions
  
- **Sunflower**
  - Standard requirements for the quality:
    - various requirements acc. the use
  
- **Soya**
  - Standard requirements for the quality:
    - humidity max. 14%, additives, impurities max. 2%, NON GMO, healthy
  
- **Triticale**
  - Standard requirements for the quality:
    - bulk density minimally 68 kg/hl, additives, impurities maximum 2%, humidity maximum 15%,
  
- **Rape seed**
  - Standard requirements for the quality:
    - various specification according the given purchaser– Czech, German system
  
- **Rape expelleres**
  - Standard requirements for the quality:
    - N-substances + fat: 38–40%, max. humidity 13%
  
- **Sugar mill chippings, dried, granulated**
  - *SBPP – sugar beet pulp pellets*
  - Standard requirements for the quality:
    - will be given on request

- **Wheat straw**
  - Standard requirements for the quality:
    - dry, visually good, in rectangular bundles

*Note In case of commodities bought by us, if any deviations occur from the standard quality, or from the quality specified by the purchaser, the relevant price deviations will be charged as given by common rules, or by the rules stipulated by us, respectively.*

**Traded agricultural commodities – our deliveries:**

- **Soybean meal, peeled, extracted**
  - Standard requirements for the quality:
  - N-substances + fat: 49%, fibre 3.5%
  - 48% of N-substance
  - produced from genetically modified soya beans
  
- **Soybean meal, extracted**
  - Standard requirements for the quality:
    - N-substances + fat: 44%, fibre 7%
    - 43% of N-substance
    - produced from genetically modified soya beans
  
- **Rape meal, extracted**
  - Standard requirements for the quality:
    - N-substances + fat: 34.5%, humidity 11.5%
    - 31% of N-substance
  
- **Rape expellers (press cake)**
  - Standard requirements for the quality:
    - N-substances + fat: 38 to 40%, humidity 13%
  
- **Sunflower (unpeeled) extracted meal**
  - Standard requirements for the quality:
    - N-substances + fat 29%, 26% fibre
  
- **Sunflower expellers (press cake)**
  - Standard requirements for the quality:
    - N-substances + fat 38%, 25% fibre
  
- **Soya beans, toasted:**
  - Standard requirements for the quality:
    - will be given on request

- **Citrus pulp, dried**
  - a product obtained by pressing of citrus fruits or a by-product from the production of citrus juice, which is subsequently dried
  - Standard requirements for the quality:
    - Fibre 12%
  
- **Distillers dried grains with solubles – DDGS**
  - *dried distillers grains with solubles*
  - Standard requirements for the quality:
    - will be given on request
  
- **Food rye**
  - Standard requirements for the quality:
    - As required by the mills
